EDGE

DESIGN

Sobinco has developed a range of **exclusive** handles and finger pulls in which the **sleek design of the Edge handle** can be used for any type of element. The handles and finger pulls for windows, doors and sliding doors ensure a uniform look, suitable for **modern-day architecture.**

FINISHES

The Sobinco handles and finger pulls are manufactured from carefully selected, **high-quality materials.**

All handles can be **polyester powder coated** in more than 450 RAL colours. Most handles can be **anodised** in various shades.

All handles for doors, sliding doors and lift-slide doors are available without a cylinder opening.

Various fixing holes are possible depending on the choice of lock. **More information can be found in our catalogue.**

ERGONOMICS

The finger pulls have a wide and deep cut-out which ensures **ergonomic** operation. The new finger pull is not only available for the cylinder-operated BT-Lock, but there are also varieties for our other types of sliding window locks, such as the handle-operated Penta-Lock, lift-slide locks and hook locks.

USER-FRIENDLINESS

Thanks to the **integrated spring system**, the Edge door handle always returns to its original starting position, also after intensive use.

The Edge door handle with integral click system can be rotated through 360° in four stages of 90° each.

With the exception of the fixed door handles and door pulls, the Edge door handles can be used on both the left and the right.

BURGLARY RESISTANCE

The **Edge Security** door handles and finger pulls are burglar-resistant. The handles come with a long backplate in solid aluminium, as a result of which the cylinder is practically inaccessible and the long backplate is almost impossible to remove.

The SKG Institute has awarded **two stars** to the Edge Security outside handles. These handles are fitted with invisible fixing holes.

The SKG Institute has awarded **three stars** to the Edge Security outside handles with cylinder protection.

The SKG Institute has awarded **three stars** to the lockable handles (30000-673 CYL, 35300-682-..CYL)

The SKG Institute has awarded **three stars** to the Edge Security finger pulls.

BELGIAN TOP QUALITY

Sobinco has an extremely large **test department** where tests are carried out continuously, such as cyclical and strength tests. Likewise, break-in tests, corrosion-resistance tests, and air, wind and water tests are also performed internally, in compliance with the most recent European or country-specific directives and quality standards.

STANDARDS

The Edge **window handles** meet the European standard EN13126-3:2012 with the following classification:

- **Standard window handles with fixed square spindle:**

1	4/180	-	0	1	4	0	3/C1	-

- **Window handles with cylinder and fixed square spindle:**

1	4/180	-	0	1	4	2/2	3/C1	-

- **Window handles with button and fixed square spindle:**

1	4/180	-	0	1	4	2/1	3/C1	-

- **Standard window handles with fork:**

1	5/180	-	0	1	4	0	3/C2	-

- **Window handles with cylinder and fork:**

1	5/180	-	0	1	4	2/2	3/C2	-

The Edge **door handles** meet the European standard EN1906:2012 with the following classification:

- **Standard door handles:**

4	7	-	0	0	5	0	A

- **Edge Security door handles:**

4	7	-	0	0	5	1	A

- **Edge Security door handles with cylinder protection:**

4	7	-	0	0	5	2	A

- **Edge finger pulls:**

4	-	-	0	0	5	0	-

- **Edge Security finger pulls:**

4	-	-	0	0	5	1	-

The Edge handles achieve a **high corrosion-resistant class 5** (480u - EN1670).

Colour anodisations

DESCRIPTION

Anodisation is an electrochemical treatment. Aluminium is immersed in a chemical bath. Due to the effect of an electrical current, the metal surface is given a decorative, durable, corrosion-resistant and hard-wearing oxidised layer. This aluminium oxide layer is therefore fully integrated with the underlying aluminium.

ADVANTAGES

- Attractive appearance with the retention of its metallic look.
- Durable, corrosion-resistant and colour-fast.
- Low-maintenance.

For maximum impact choose:

Handles
for windows, doors and sliding doors
in the same colour anodisation
as the aluminium sections.

SOB**OR**

We are Sobinco. We get things done. We specialise in the development and production of innovative locking systems and components for the aluminium windows and doors industry.

At Sobinco **the entire production process takes place under one roof**.In this way we are able to manage and control the value creation chain from start to finish. This gives us **great flexibility** and allows us **to attain sustainable results over the short term**.

Innovation is our passion. Our creativity, expertise and craftsmanship provide a guarantee of added value which translates into **high-quality products, easy assembly, modularity, sustainability and aesthetic comfort.**

Driven by this passion, **our team** at all times endeavours to **improve our current products and develop new ones**. To this end, we listen to the market and to our customers.

We use **high-quality materials** for our product development. These products are **exhaustively tested in line with the strictest of guidelines and quality requirements**. Every product must satisfy these as a minimum and their ratings often exceed the required standards.

We have a **strong customer focus**. Not only in the development of our products, but also in our after-sales support, during the installation process and even long afterwards.

Sobinco is a financially viable and high-tech environment where our specialists can focus on their strengths. With more than 60 years in the business, you can rest assured that we are a reliable partner, ready to seize the opportunity. Nevertheless, we remain approachable. In short, **a family atmosphere, where there is mutual respect** for management, customers, partners and employees.

We are Sobinco. We get things done. We listen. We think in terms of opportunities. We are not afraid to roll up our sleeves.
