<b>7. Application examples</b> .....	H13.11.12

## 1. General information

- Handles with incorporated drive mechanism for the perimeter locking set.
- These handles are used to operate the horizontal and vertical pivoting windows with perimeter locking sets series 4608, 4606 and 4603.
- The standard handle is left hand. A left hand handle is turned to the left to open the window. On request we are able to manufacture right hand handles as well. When ordering please indicate quantity of left hand and right hand handles.
- Finish: aluminium anodised or polyester powder coated in more than 450 RAL colours. The handles with cam (N) can't be anodised.
- The handles are supplied with 3 mm thick forks, steel zinc plated:
  - series 502 and 5020: with 1 straight fork
  - series 503 and 5030: with 2 straight or cranked forks

### 1.1. Handles series 502 and 503

With straight grip

left hand = illustrated  
right hand = opposite view

### 1.2. Handles series 5020 and 5030

With round grip

left hand = illustrated  
right hand = opposite view

HANDLES

## 2. Variations

### 2.1. Right hand handles (RIGHT)

- The handle must be turned to the right to open the window.
- When ordering please add the word 'RIGHT' to the order code.

### 2.2. Handles with fixing holes out of centre (B)

- The fixing holes of the handle are out of centre.
- When ordering please add the indication 'B' to the order code.

### 2.3. Handles with concealed fixing holes (VI)

- Handles with central as well as out of centre fixing holes are available with concealed fixings.
- Special VI screws and grub screws in stainless steel are supplied together with the handle.
- When ordering please add the indication 'VI' to the order code.

## 2.4. Handles with security cylinder (CYL)

- The handles series 502 and 5020 are available with security cylinder.
- When ordering please add the indication 'CYL' to the order code.

## 2.5. Operating mechanism with loose grip n° 505: type V

- All handles can be supplied as operating mechanism without grip.
- The operating mechanisms can be operated by loose grip n° 505.
- This is especially suitable in places where only authorized people can open the windows. In case of fire, the square pointed end of a fireman's axe can also operate the handle.
- When ordering please add the indication 'V' to the order code.

## HANDLES

## 2.6. Operating mechanism with loose grip n° 505: type W

- All handles can be supplied as operating mechanism without grip.
- The square hole is flush with the backplate for this type.
- The operating mechanisms can be operated by loose grip n° 505.
- This is especially suitable in places where only authorized people can open the windows. In case of fire, the square pointed end of a fireman's axe can also operate the handle.
- When ordering please add the indication 'W' to the order code.

## 2.7. Handles for ventilation position (N)

- All handles can be supplied with grip with cam for ventilation position.
- The handles with cam are only available as right hand handle.
- The handles with cam aren't available with anodised finish.
- When ordering please add the indication 'N' to the order code.

### 2.8. Handles with location pins for PVC sections (K)

- Certain handles series 502 and 5020 are available with a cover plate provided with 2 pins which fit into the PVC section to provide improved location.
- This variation is not possible for handles with security cylinder (CYL), with invisible fixing holes (VI) and for handles n° 502-7 and 5020-7.
- When ordering please add the indication 'K' to the order code.

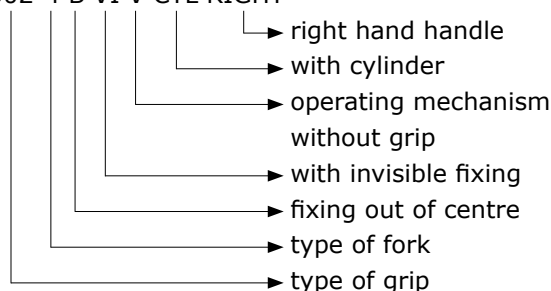

### 2.9. Handles with opposite turn direction (P)

- With these handles the grip turns to the opposite direction.
- Example: When the handle is mounted on the horizontal face of the vent section, the grip must turn away from the glass. This is the case when the handles are used to operate a project-out window of which the vent section is not suitable to mount the handle on the vertical vent surface.
- The handles series 502, 5020, 503 and 5030 are available as P-type.
- When ordering please add the indication 'P' to the order code.

503-1.10C	17
503-1.10	19
504V-1.10	23
503-2.10	28
502-16.10	31

## 6. Preparations

### General

- Only the handles with 1 fork are possible with cylinder.
- Dimension X is profile-related.
- The handles are preferably fixed with blind rivnuts. Therefore you must drill holes with diameter  $\varnothing 7.1$  mm. Fixing holes M5 when you fix directly in the profile.

### Handles with 1 fork (502 and 5020)

Without cylinder

With cylinder

Standard: A=8.5 mm  
B-version: A=4 mm

### Handles with 2 forks (503 and 5030)

Fork in the middle

Fork out of centre
