STANDARD CYLINDERS

CONTENTS

1. Standard cylinders series 880	L12.12.03
1.1. Key operated n° 880-.-..	L12.12.03
1.2. Knob operated n° 881-..K-.. and n° 881-.-..K	L12.12.04
1.3. Knob operated n° 882-..K-.. and n° 882-.-..K	L12.12.05
2. Half standard cylinders series 880	L12.12.06
2.1. Key operated n° 880-10-..	L12.12.06
2.2. Knob operated n° 881-10-..K	L12.12.07
2.3. Knob operated n° 882-10-..K	L12.12.07
3. Applications	L12.12.08

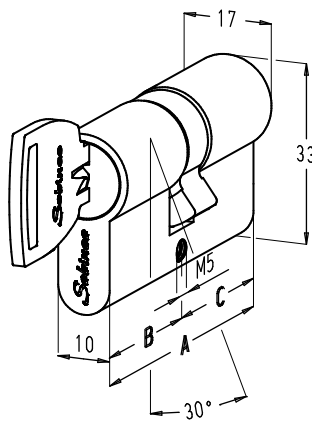

1. Standard cylinders series 880

1.1. Key operated n° 880-...-...

- Cylinder and keys in brass nickel plated. The cylinder is supplied with 3 keys.
- Quantities of 2 to 50 keyed alike cylinders and combinations with different lengths and types are available.
- Delivery time on request for master key combinations and quantities of more than 100 keyed alike cylinders.
- The cylinders may only be lubricated with WD40 lubricant. Only the key may be lubricated.
- Options:
 - A = keyed alike cylinders with the same dimensions (e.g. 880A-35-50)
 - DA = keyed alike cylinders with the different dimensions (e.g. 880DA-40-70)
 - M = cylinder as part of a key plan (e.g. 880M-45-65)

STANDARD CYLINDERS

3. Applications

- The Sobinco cylinders are available in master key combinations: central locking system, master key combination as well as grand master key combination with different groups.

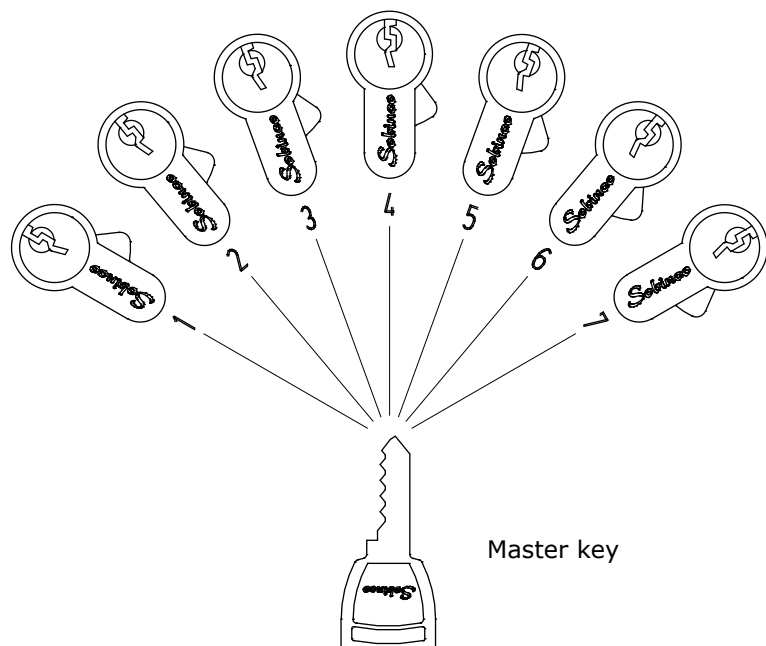

Central locking system

- For example, this combination is used in blocks of flats where all flats have different keys.
- The key of each flat can also operate the central cylinder of the main entrance door.

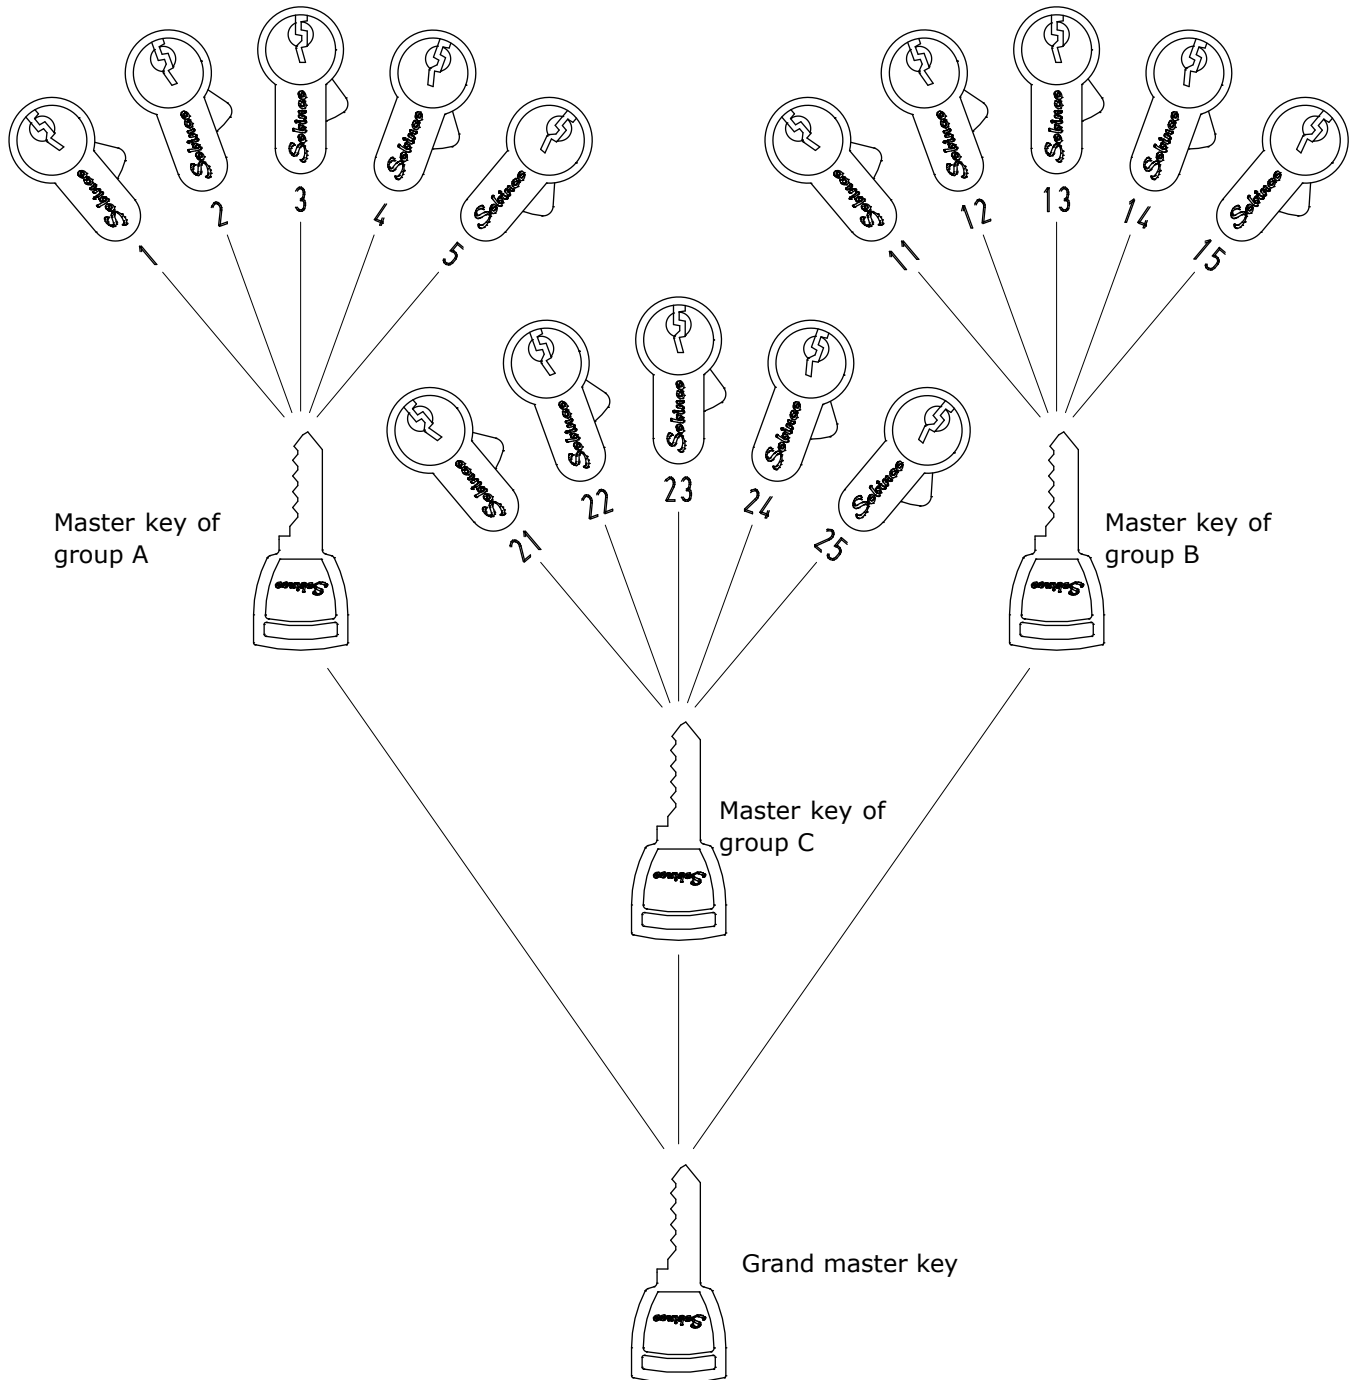

Master key combination

- Each key opens its own door only.
- The master key opens all doors.

Grand master key combination

- Each key opens its own door only.
- Each master key opens all doors of its own group.
- The grand master key opens all doors.
